EXPERIENCE

Epic!, Redwood City — *Senior Web Engineer*

February 2022 - November 2022

– Onboarded and mentored new engineers to prepare them for working either individually or in tandem with another engineer on a pod structure.

– Integrated a state management system using NGRX to give developers more confidence and understanding of how the app state

– Implemented enhancements which improved web functionality and responsiveness.

Epic!, Redwood City — *Web Engineer*

January 2019 - January 2022

– Integrated and maintained 3rd party tools such as Google Tag Manager and Google Analytics to support sitewide tracking and internal reporting.

– I collaborated with engineers, designers, and other stakeholders to iterate on and develop the user experience based on desired functionality, to increase KPIs such as user acquisition and retention.

– Managed and ran sprint deployments for my team and recorded documentation on team processes to increase team wide knowledge.

PROJECTS

Lordbnb – *Sole Developer*
Demo | Github - *React/Redux, Rails 5, HTML 5, CSS 3*

I created a MVP of a Lord of the Rings booking website using wireframes and utilizing the Google Maps API. Implemented CRUD operations to handle data input that would persist to a PostgreSQL database.

GravBall – *Sole Developer*
Demo | Github - *JavaScript, HTML5, CSS3*

I made a gravity attraction simulator using vanilla JavaScript and HTML5.

SKILLS

Languages

JavaScript, TypeScript, HTML5, CSS3, Ruby

Frameworks/Libraries

React, Redux, Angular, NGRX, RxJS, AngularJs, Express, Node.js, Cypress

RELATED TOOLS

Git, Figma, Jenkins, Docker, Wireframing

EDUCATION

AppAcademy, San Francisco

Spring 2018

A 1,000 hour immersive full–stack web development bootcamp with a <3% acceptance rate

University of California – Riverside — *BS Biology*

2012 - 2016
